## Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date          | 15 October 2022                      |
|---------------|--------------------------------------|
| Team ID       | PNT2022TMID41701                     |
| Project Name  | Project – Crude Oil Price Prediction |
| Maximum Marks | 4 Marks                              |

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)                     |
|--------|-------------------------------|--|
| FR-1   | User Registration             | Registration through Form                              |
|        |                               | Registration through Gmail                             |
| FR-2   | User Confirmation             | Confirmation via Email                                 |
|        |                               | Confirmation via OTP                                   |
| FR-3   | Graph                         | Showing graph by obtaining the data from the dataset   |
| FR-4   | Support                       | Providing answers for the queries asked by users.      |
| FR-5   | News                          | Information of the oil prices will be updated by admin |
| FR-6   | Notification                  | Notification will be sent for the users price alert    |
| Fr-7   | Database                      | Information of the User will be stored                 |

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description  |
|--------|----------------------------|--|
| NFR-1  | Usability                  | It can use by wide variety of client as it is very   |
|        |                            | simple to learn and not complex to proceed.  |
| NFR-2  | Security                   | We are using login for the user and the information will be hashed so that it will be very secure to use.          |
| NFR-3  | Reliability                | It will be reliable that it can update with very time period so that the accuracy will be good.                    |
| NFR-4  | Performance                | It will be perform fast and secure even at the lower bandwidth.  |
| NFR-5  | Availability               | Prediction will be available for every user but only for premium user news,database and price alert will be alert. |
| NFR-6  | Scalability                | It is scalable that we are going to use data in kb so that the quite amount of storage is satisfied.               |
